

Genie[®]
ULTRA HYDROPHILIC IMPRESSION MATERIAL

**MADE TO PERFORM.
PRICED TO PLEASE.**

Sultan Healthcare

RELIABLE PERFORMANCE— NO MATTER THE TECHNIQUE.

Discover Genie® brand from Sultan Healthcare—a dental materials leader with 150+ years of expertise.

After decades of proven performance, the Genie® brand delivers the impression and bite materials dentists reach for—for detailed, precise impressions that save time and money*. That's because it's chemically engineered to produce reliable results, every time, no matter the use or technique.

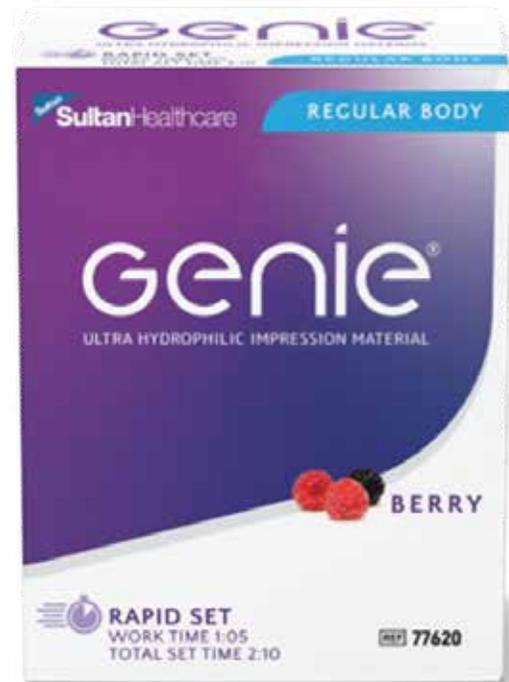

Made to perform. Priced to please.

*Price Positioning Analysis, Impression and temp materials, Keystone 2024

A GREAT FIRST IMPRESSION IS PRICELESS.

Engineered for precise dental impressions, Genie® impression material delivers exceptional accuracy, dimensional stability and ease of use. Thanks to its versatility, it ensures a great experience for clinicians and patients alike.

Why choose Genie® impression material?

Versatility

Choose from a variety of options:
 5 viscosities (putty, heavy, regular, light, extra light),
 2 setting times (rapid or standard),
 3 delivery systems (machine-mixed, automix-cartridge, hand-mixed putty).

Flowability

Genie® materials flow readily into the tiny crevices of cavity preparations to accurately capture margin details.*

Patient comfort

Genie® comes in a pleasant berry flavor and has a rapid setting time for patient comfort.

Visual confidence

Color combination and contrast help clinicians feel more confident in their impression interpretations.

*Material flow "Shark Fin Study" test (26mm) performed by Tufts University. Unpublished study. Data can be requested at customer.service@sultanhc.com

HEAR WHAT GENIE® USERS HAVE TO SAY

For decades, Genie® material has proven its worth to clinicians through its high performance and customer satisfaction—all at a great value. But don't take our word for it—see what Genie® users have to say.*

They're brand loyal

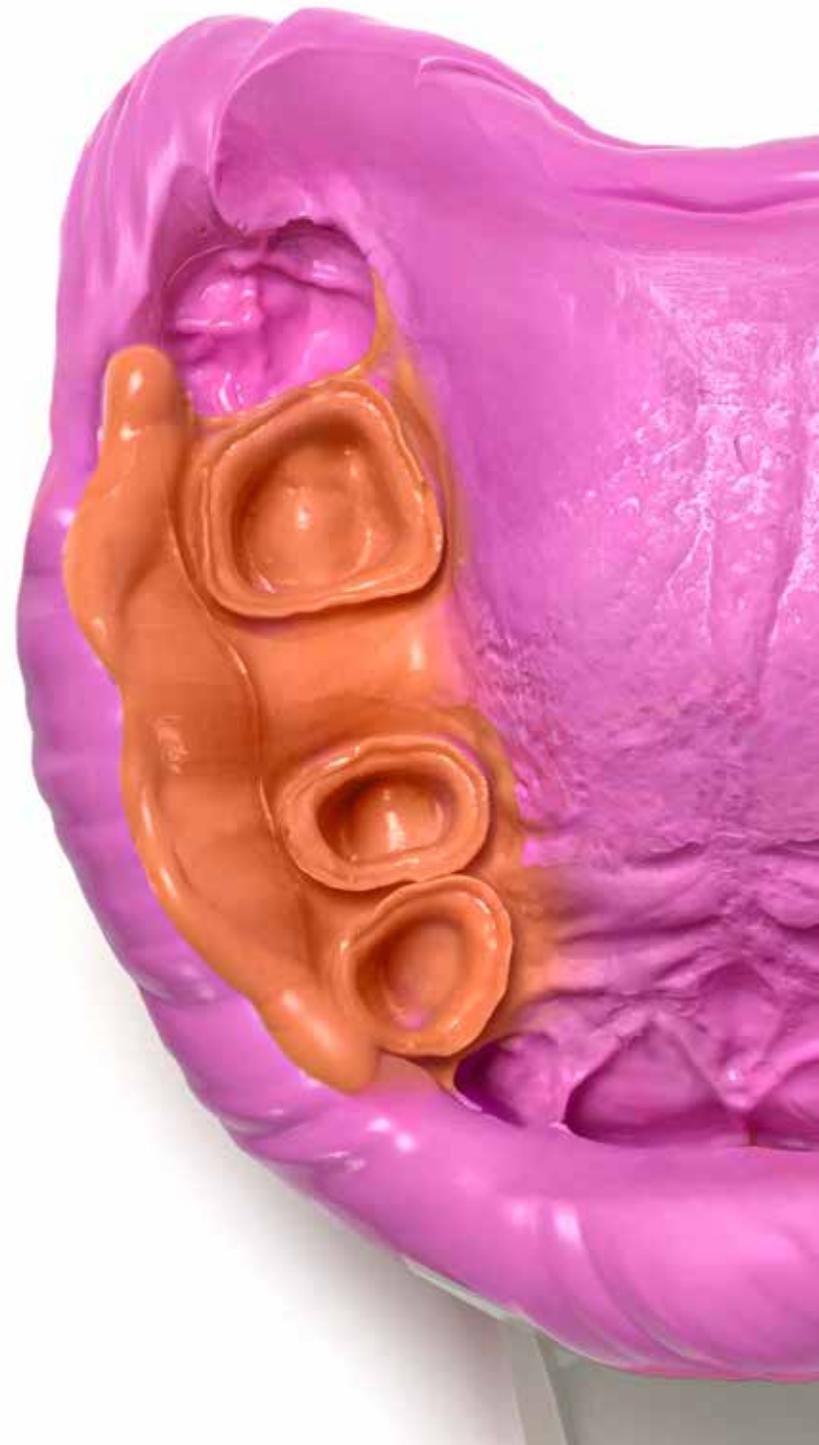

56.7% of Genie® users are loyal to the brand—for 10 years or more!

Genie® is a product dentists recommend

The majority of respondents started using Genie® thanks to a colleague recommendation

They appreciate its benefits

Survey respondents recognized reliability, price-to-performance ratio and versatility as the top three benefits of Genie®.

WITH GENIE[®], YOU'VE GOT OPTIONS

Every case—and clinician preference—is unique. That's why Genie[®] comes in a variety of viscosities, setting times and delivery systems.

Viscosity options

Depending on your impression technique and personal preference, choose from the following:

- Genie[®] flowable viscosities in “Extra light”, “Light” + “Regular” for syringe application around the tooth
- Firmer viscosities in “Putty”, “Heavy” + “Regular” are for use as tray material

Delivery system options

Genie[®] is available in a range of delivery systems:

- 445 gram jars
- 380 ml cartridges (for use with mixing machines)
- 50 ml cartridges (for use in combination with a dispenser gun)

Material	ISO Type	Viscosity	Use	Color
Putty	0	Putty	Tray	●
Heavy	1	Heavy Body	Tray	●
Regular	2	Medium Body	Tray-Wash	●
Light	3	Light Body	Wash	●
Extra Light	3	Extra Light Body	Wash	●

Genie[®] Insider Tip

“Regular” viscosity is the only viscosity that can be used for both syringe and tray application—making it the recommended viscosity for simpler cases and the monophasic technique. For more challenging cases, extra light or light are recommended.

GET A BETTER BITE.

Registering the bite accurately is crucial for the success of a restoration¹. In addition to the practitioner's skill and technique, the material used can also have a decisive impact on the accuracy of bite registration².

Genie® Bite is specifically designed to help dentists achieve accurate bite registration. It starts off with a light, fluffy consistency that stays where you put it without slumping. Once set, it becomes rock-hard, so it captures and keeps great detail without compressing or flexing during model mounting.

Why choose Genie® Bite?

Hardness

Genie® Bite has a quick, rock-hard set to a Shore "A" hardness of 90+. This helps to resist any distortion and maintain an accurate bite.

Patient comfort

With a pleasant mint flavor and fast (90-second) and super fast (60-second) setting times, patients remain comfortable.

Ideal consistency

Genie® Bite has a light, fluffy consistency that doesn't cause resistance, interference with occlusion or significant thickness between the patient's arches³.

Ease of handling

50 ml automix cartridges deliver ease of handling during preparation and use of material⁴.

YOU SPOKE. WE LISTENED.

According to recent market research, 50% of clinicians surveyed said they strongly prefer an open mix tip system.* Customer satisfaction is very important to us—so we’re going back to our open mixing system. That means our cartridges now work with the most common mix tips on the market—with the same impression material you know and love.

Find the correct mix tip

Product	Use	Cartridge	Mix tip
Genie® Putty	Tray		
Genie® Heavy	Tray	50 ml/380 ml**	
Genie® Regular	Tray/Wash	50 ml/380 ml**	
Genie® Light	Wash	50 ml	
Genie® Extra Light	Wash	50 ml	
Genie® Bite	Bite	50 ml

A SOLUTION FOR EVERY SMILE.

Sultan Healthcare offers clinicians reliable solutions for the full spectrum of restoration needs—from impression to temporary crown and bridge materials. It's a synergistic system that delivers exceptional experiences and successful outcomes.

Silgimix® alginate replacement impression material

This material combines the low cost of an alginate with the detail and versatility of a VPS. Silgimix® material works hand-in-hand with Versa-Temp® 2 material.

Versa-Temp® temporary crown and bridge resin

From single-unit crowns to more demanding cases, Versa-Temp® and Versa-Temp® 2 enable beautiful temporaries that contribute to improved clinical results.

SensiTemp® temporary cements

Available in an automix delivery system, SensiTemp® offers no mess, easy cleanup, minimal waste and maximum patient comfort.

GENIE® PUTTY

Code	Setting Time	Pack
77655	Standard	300 ml Base + 300 ml Catalyst + 2 dosing spoons
77650	Fast	300 ml Base + 300 ml Catalyst + 2 dosing spoons
